

RIVERVIEW FARMS

Home of Riverview Farms of Monterey County

OUR MISSION IS SIMPLE.

We are not
“weed” people.

We are farmers.

We are here to work
with our buyers to
produce the finest
quality product to
meet their needs and
demands.

It's a partnership.

OUR SERVICES

RVF offers a wide range of products and services to fit your business needs. Being a vertically integrated, seed to sale company allows us to provide solutions that are customized to fit our partner's needs.

BULK SALES

We're a 365-day operation meaning we can fulfill your bulk orders year round. Whether you're looking for a certain strain or quantity, we've got you covered.

RETAIL PRODUCTS

Pre-rolls, packaged flower and more...we supply Retail Stores statewide under our Riverview Farms & 4Republic Brands.

WHITE LABEL

Our flower, your brand. We grow product for you, the process and package to your specification so that you can focus on building a successful brand.

WE GROW

SUSTAINABLY

Cannabis is a naturally grown plant that comes from this Earth, so it's important to us to do our part to preserve our planet. Reducing our waste and carbon footprint is an essential consideration for all steps of our operation.

REDUCE WATER

- Drip Irrigation
- Reclaimed Water

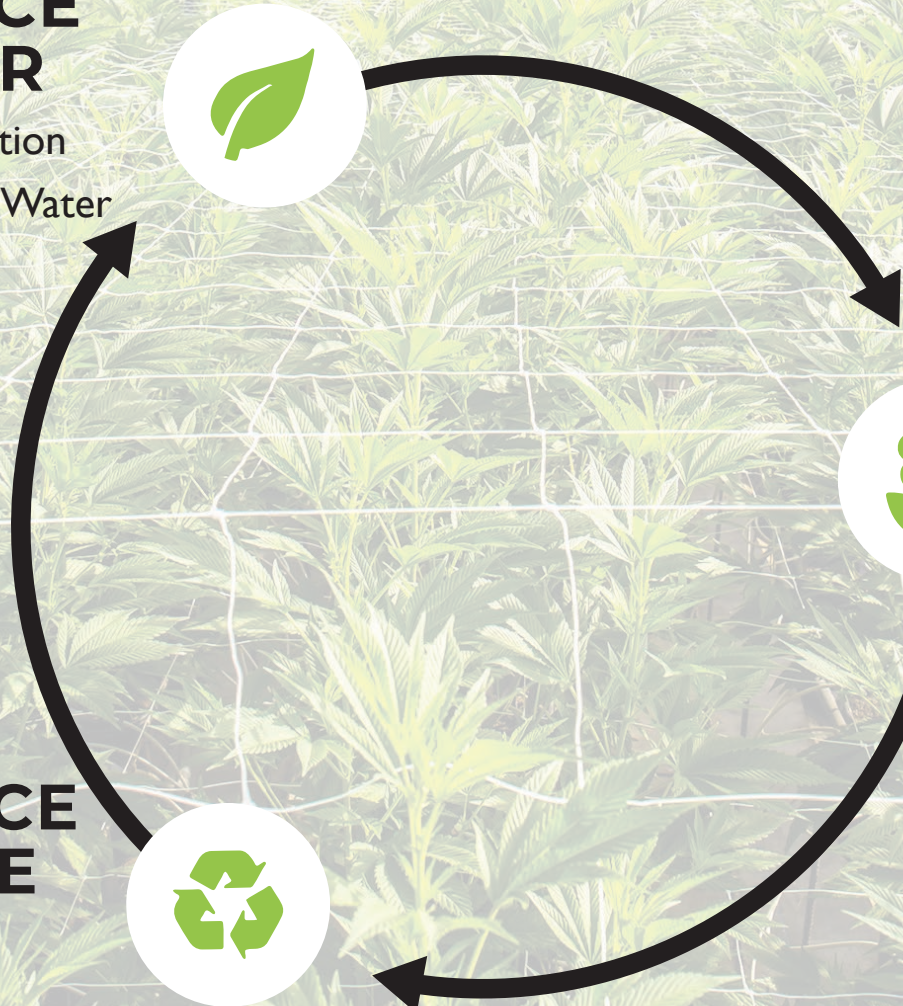

REDUCE ENERGY

- Natural Sunlight
- UV Roofing
- Acrylite Roof Coat

REDUCE WASTE

- Recycle
- Reuse Soil
- Avoid Single Use of pots

RVF IS A FAMILY

Combining cutting-edge technology with proven agricultural methodology, Riverview Farms (RVF) is a vertically integrated, fully licensed and compliant 365-day operation located in Salinas, California.

Today, RVF is a leader in the industry and the largest female-minority owned grower of cannabis in the world.

We think the world of our team. They are the backbone of our operation and without our employees, there is no company. There is no Riverview Farms.

– Michelle
RVF President

The heart of our operation, the Growing & Production Teams work hard to ensure we're producing top-quality California cannabis in the most effective and sustainable way.

Our president, Michelle Hackett, brings three generations of agricultural knowledge to the cannabis industry.

Riverview Farms is proud to employ over 75% female workforce. From cloning, to trimming, our ladies are unstoppable.

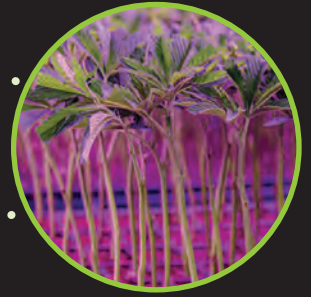

At RVF women make it happen!

HOW RVF GROWS

Even with our scale,
we deliver fresh
product every 14 days.

OUR GREENHOUSE

20 ACRES. YEAR-ROUND PRODUCTION.

From seed to sale, in the heart of the Salinas Valley.

It all starts here with clean mothers. All mother plants are put through a screening process to ensure they are virus free, pest free, and robust before they are approved to go into production of clones. We cycle our mother stock after every third cut to eliminate any potential disease and to ensure we maintain the highest quality of clone we can produce.

We blend all of our own nutrients in-house daily to ensure the perfect recipe for each varietal. We adjust each level of nutrient to accommodate the plants specific needs, allowing us to ensure each strain meets its full potential.

We don't purchase any soil with additives or fertilizers. We start with high grade neutral soil that we then custom blend in-house. No shortcuts here, we do as much in-house work as possible to ensure we meet RVF expectations.

Our fresh water comes from our own wells on property. Tested regularly by outside laboratories to ensure safety and cleanliness, our wells are over 870 ft deep and require no filtration system. Our water is so clean we could bottle and sell it...literally!

The most natural way to combat "bad" bugs that could harm our plants is by releasing "good" bugs to overpopulate them. Using natural biologicals combined with the application of organic sprays keeps our plants pest free.

With a monitoring solution from HortiMaX, our team can ensure the perfect temperature and humidity. Automatic ridge vents, fans, black out curtains and heaters help our greenhouse achieve a peak growing environment, 365 days a year.

OUR

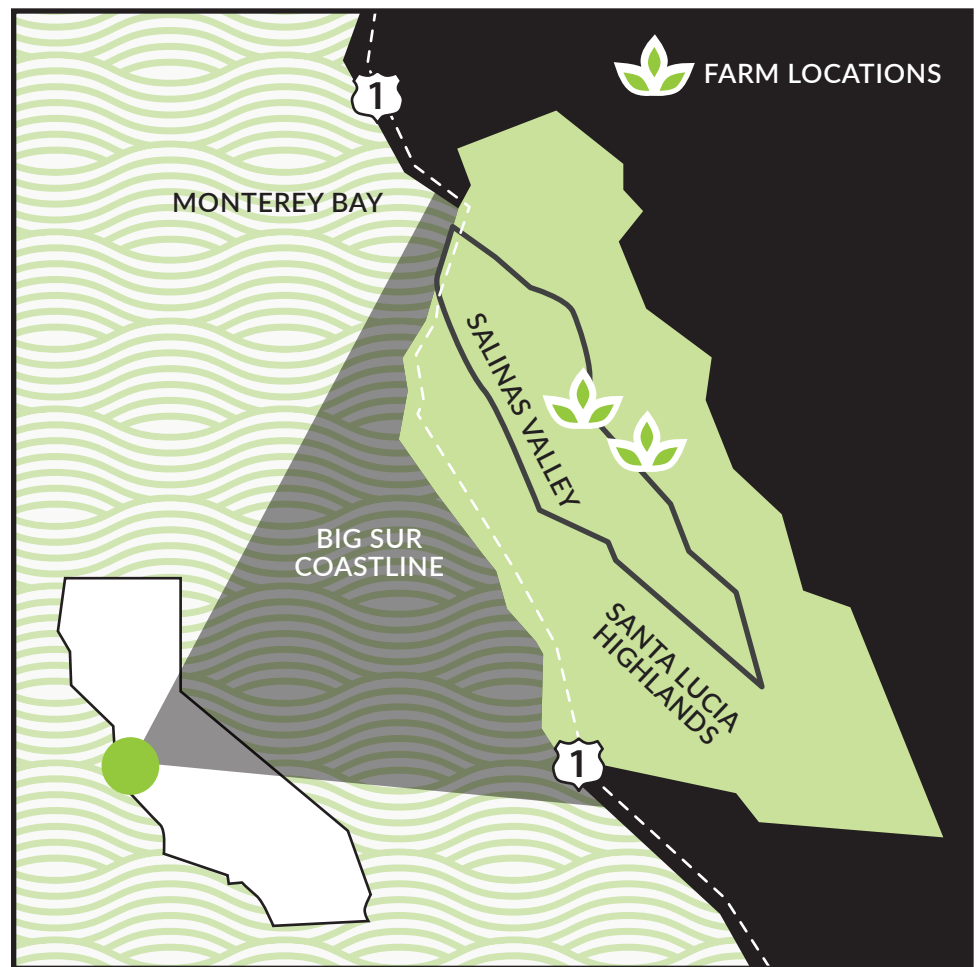

FARM

Natural is Better.

When it comes to farming, its all about location. The combination of the Pacific Coast and the Salinas Valley produces an ideal climate for year-round production. Riverview Farms are located in the center of the Silicon Valley of Agriculture between the Big Sur coastline, the Santa Lucia Highlands, and the Monterey Bay.

The Salinas Valley, known as the Salad Bowl of the World, it's the highest producing agricultural valley in the World.

Monterey County is known for their leafy greens, artichokes, strawberries, grapes and NOW cannabis (#3 Crop).
